

It's Time to Move Forward.

We'll help you do it with peace of mind.

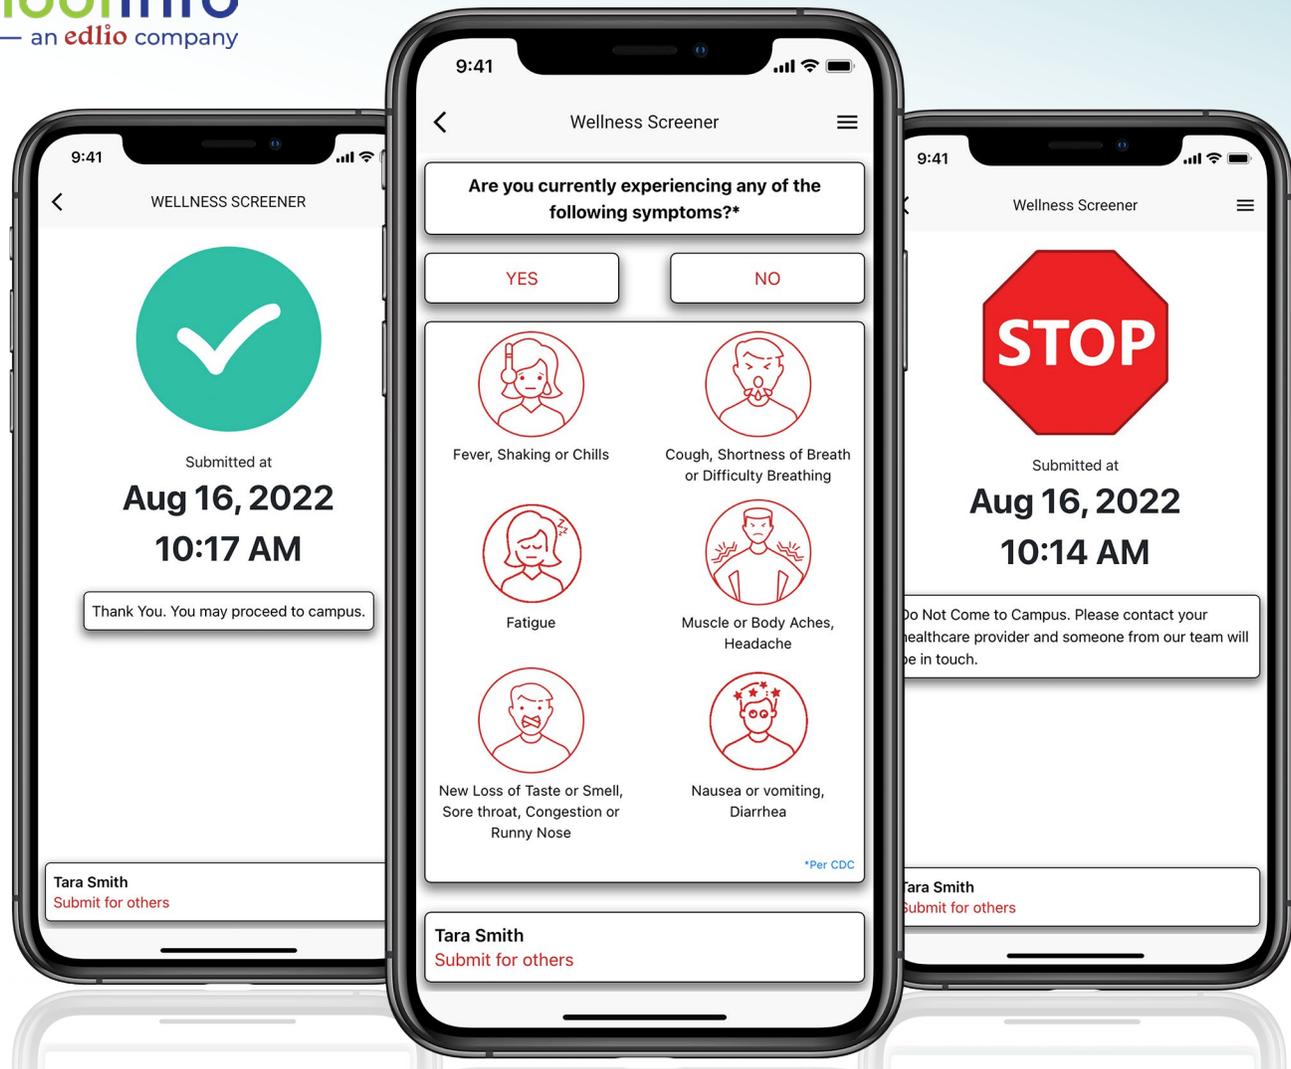

Manage Campus Safely

After the global pandemic, schools are required to prepare a certain level of methodology to ensure safety on their campuses. While there are certain protocols required by individual schools and districts, there is also guidance to be adhered to from federal, state, and even local governments.

At the top of that list is the process of recording symptoms and possible exposures of those on campus. SchoolInfo takes the guesswork out of this process with our Wellness Screening Feature. Being used by many of our clients already, this tool is the product of listening to the needs of educators on the front lines.

Why an App?

- Speak with confidence on the safety of managing campus to families, your staff, and the community.
- Everyone, including families, faculty, and staff, enjoy clear and simple status reporting with our user-friendly technology.
- Ease the administrative burden of your staff.

Help Families and Staff Feel Safe On Campus with SchoolInfo

- Pre-screen anyone coming to campus to determine if they have or are showing symptoms, or if they have been in contact with anyone that has or has been exposed to a virus you are tracking.
- Users safely and securely submit answers directly through a school or district custom branded app.
 - Choose from universal questions, or those specific to the needs of your school, district, county, or state.
- Parents/Guardians, students, and staff receive clear indications of next steps if they are at risk for, or have been exposed to someone with COVID-19 or another virus.
- Comprehensive reporting for administrators to know who is cleared and who is temporarily blocked from returning to campus due to possible symptoms or exposure.
 - Upload copies of vaccination cards for simple reporting and recording of vaccine status.
